

## Can you match the animal to its fact? Don't peek!

This animal may grow and use up to 20,000 teeth in its lifetime!

This animal's babies eat milkweed before they make a big change.

These animals have tongues that attach to the front of their mouths, not the backs.

Almost all of these animals have venom (poison) in their fangs. Most of them can't hurt humans though.

These cold weather birds actually drink salt water! They have a special gland in their bodies that removes the salt.

These animals have wings that are made up of skin that stretches out over their very long fingers! They don't hang in caves by their fingers though, they hold on with their feet

This animal can eat up to 30 pounds of bamboo in a day! That's a lot!

This animal creates the loudest sound of any creature on earth.

This insect can survive for a week without its head, and then it only dies of starvation!

This underwater animal takes seven years to reach a pound in weight.

Spider

lobster

Humpback whale

Frog

Bat

Cockroach

Panda

Monarch butterfly

Shark

Penguin
